COMMUNITY WiFi

More customers. Less cost.

EVERYONE'S YOUR CUSTOMER WITH EASY, SHAREABLE INTERNET

Kacific Community WiFi lets you build networks of high-speed WiFi hotspots to provide internet to communities and tourists in bite-sized packages with an easy prepaid voucher system.

Small, easy-to-install satellite dishes let you share Kacific wholesale bandwidth, selling it through local shops, cafes, resorts and communities.

You can connect groups of people in even the most remote places and allow them to roam between hotspots.

COMMUNITY WiFi

Your customers will purchase prepaid internet either online or through a voucher, making revenue collection risk-free, fuss-free and transparent. People can use the data they purchase in any of your Kacific Community WiFi locations, so you enjoy all the benefits of owning a WiFi network without having to invest in expensive infrastructure, file costly spectrum licenses or reckon with customer churn.

Your customers will enjoy wide coverage, flexible data purchasing, an easy pre-pay model and no long-term commitments. The result: eager customers drawn to a low-cost service offering most of the advantages of a WiFi network, without the risk and without the cost.

- Aggregate customer bases through local outlets
- Easy, low-cost installation
- Affordable, high-speed internet
