### The heart of broadband

Powered by next-generation satellite technology, Kacific provides affordable, high-speed satellite internet to homes, businesses, and governments across Asia Pacific.

**FLEXVNO**

Your own uncontended, highly flexible, Virtual Network Operator bandwidth.

## ALL-IN CONNECTIVITY

Kacific FlexVNO, our leading service and our most versatile, delivers dedicated wholesale bandwidth to ISPs and telecom companies to tailor for your customers needs.

Take ownership of your leased allocated bandwidth and configure it into different packages with the Virtual Network Operator platform.

## FlexVNO

You have the power to offer truly tailored packages with a myriad of configuration parameters with Kacific FlexVNO. Spread your bandwidth across a large fleet of terminals, set preferences on some services or at some sites, set packaging boundaries and limits, or integrate bandwidth into your network with your traffic rules.

Kacific FlexVNO bandwidth delivers a rapidly deployable and cost-effective broadband solution with small, easily installed, simple to maintain satellite dishes.

- Uncontended high-speed broadband
- Versatile service for tailoring to your customer needs
- Rapid and flexible deployment

## FEATURES

**1GBPS+**

Delivers speeds of 1Gbps downlink and 150 Mbps uplink of turnkey capacity to a site
