# ***INTERNET OF THINGS***

Connect & monitor with on-site high-speed Internet

## THE CONNECTED SITE

Businesses with Internet of Things applications – such as sensors for soil salinity, nutrient levels and humidity – need low-cost, fuss free connectivity on site.

The Kacific IoT service provides reliable, affordable and easy connectivity for small devices and sensors, even in rural and remote sites.

## KACIFIC INTERNET OF THINGS

Set up rapidly with a new Kacific satellite dish or connect through your current one. With fully-managed services and a pay-as-you-go plan, Kacific makes the connected site a reality.

- Reliable connectivity in areas without 3G/4G access
- Easy, rapid installation
- Fully managed service

## FEATURES

**10 MBPS**

(5 Mbps downlink  
+ 5 Mbps uplink)

Easy, rapid  
installation

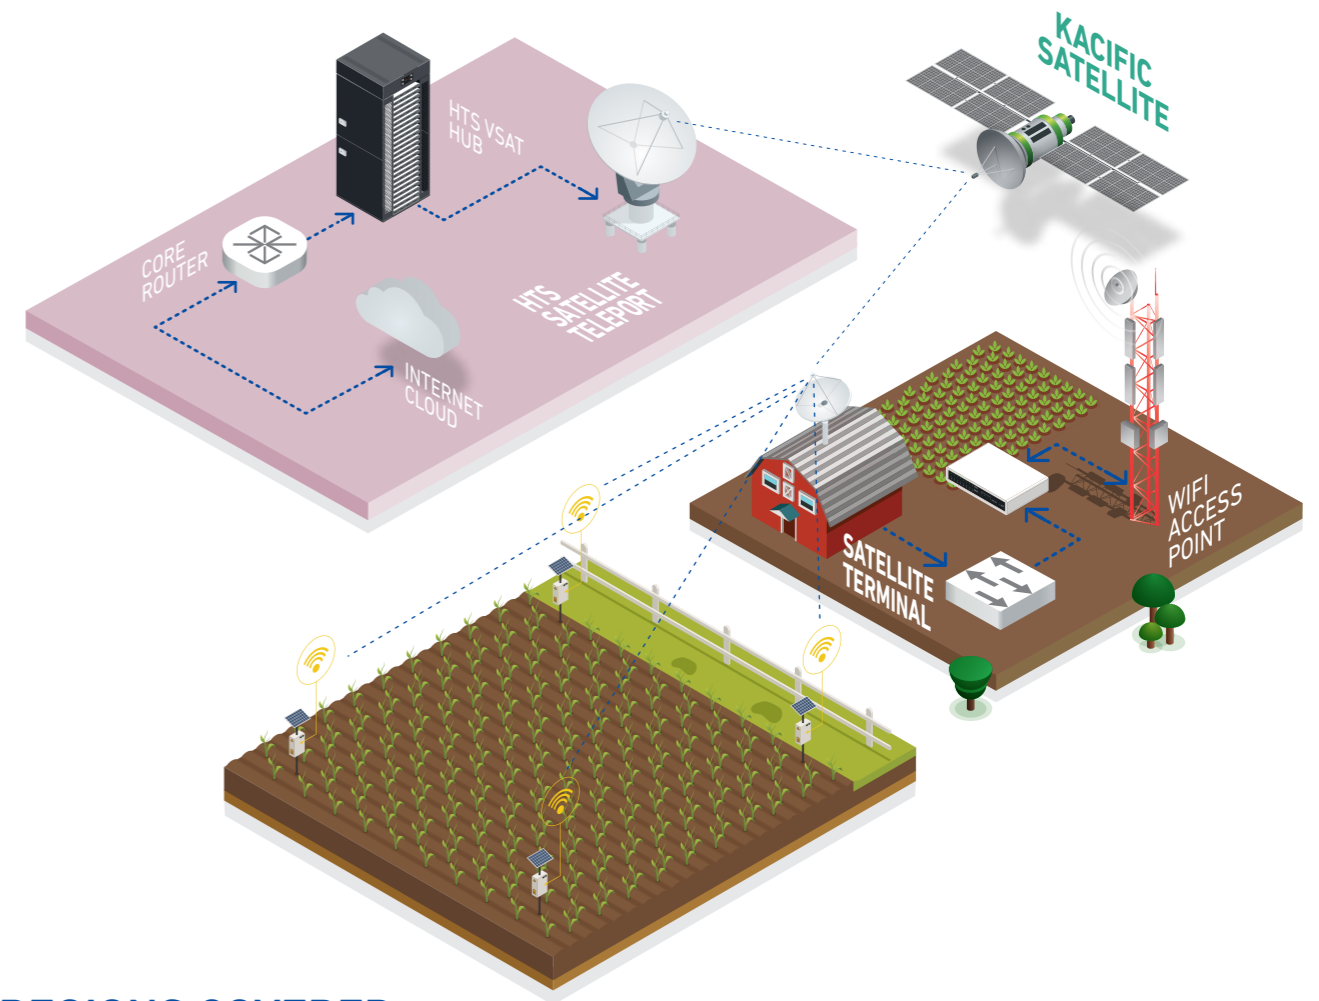

75cm, 1m or 1.2m  
satellite dish

Pay-as-you-go plan
