The heart of broadband

Powered by next-generation satellite technology, Kacific provides affordable, high-speed satellite internet to homes, businesses, and governments across Asia Pacific.

MARITIME

Stay connected even in the high seas.

AHOY!

Sail away and stay connected to reliable, high-speed satellite broadband at sea with Kacific Maritime. Our high capacity bandwidth offers a cost-effective broadband solution for seafaring vessels.

Whether you operate a cruise ship, ferry, fishing boat or diving liveboards, Kacific can provide your passengers and crew with high-speed internet for browsing the web, uploading photos, staying in touch, streaming videos and even emergency connectivity during your journey on the high seas.

SURF ON-BOARD

Using next-generation satellite technology, our service maintains a reliable network on large swathes of ocean within our satellite beams, providing consistent communications even in rough seas. Kacific Maritime easily provides speeds of over 50 Mbps on a ship, with straightforward payment models. Tailored packages can be adapted to suit your needs and scaled to provide an excellent service for your fleet.

- Reliable, high-speed broadband
- Connectivity even in rough seas
- Scalable
