The heart of broadband
Powered by next-generation satellite technology, Kacific provides affordable, high-speed satellite internet to homes, businesses, and governments across Asia Pacific.

OFFSHORE CONNECTIVITY

Reliable connectivity for your offshore operations.

RELIABLE CONNECTIVITY OFFSHORE

Stay connected to reliable, high-speed satellite broadband in offshore environments with Kacific Offshore. Our high capacity bandwidth offers a cost-effective and seamless solution for your offshore operations, even in rough seas.

It equips your crew with high-speed WiFi for personal use and your on-board systems with fast data backhaul and VPN controls for all business, and health & safety connectivity on your vessel, rig and other offshore station operations.

KACIFIC OFFSHORE CONNECTIVITY

Using next-generation high throughput satellite technology, our service maintains a reliable network within our satellite beams, providing consistent communications. Our solution easily provides speeds of over 50 Mbps with a straightforward payment model per station per month - or simply per Gigabyte. Tailored packages can be adapted to suit your needs and scaled to provide an excellent service.

- Reliable, high-speed broadband
- Connectivity at sea for crew, automated systems, business use or emergency use
- Scalable across many offshore stations within Kacific coverage
